

SANSKRATI MOOLCHANDANI

UX DESIGNER

+91 7067785857 | sanskratimoolchandani@gmail.com | Indore, Madhya Pradesh

SUMMARY

A UX Designer who has learned to turn complex requirements into simple, intuitive experiences. I enjoy understanding the "why" behind a problem, exploring ideas through brainstorming and research, and translating them into thoughtful designs that balance user needs, business goals, and technical feasibility.

EXPERIENCE

47billion Oct 2024 – Present

Indore, Madhya Pradesh | UX Designer

- Gather and analyze product and business requirements through stakeholder meetings and research.
- Conduct brainstorming and ideation sessions to explore problems and generate innovative solutions.
- Document requirements, use cases, user flows, wireframes, and design decisions for clarity and alignment.
- Collaborate with developers to understand technical constraints and ensure feasible, scalable design solutions.
- Design intuitive and visually engaging user experiences while aligning with project timelines and deadlines.
- Participate in design reviews and iterate based on feedback from stakeholders, users, and developers.

Bombay Softwares Jun 2024 – Oct 2024

Ahmedabad, Gujarat | Executive UI/UX Designer

- Designed user-centered interfaces for web and mobile platforms.
- Created wireframes, prototypes, and high-fidelity designs in Figma.
- Collaborated with clients and internal teams to understand requirements and deliver tailored solutions.
- Worked closely with developers to ensure design consistency and smooth implementation.

Eulogik Pvt. Ltd. Feb 2023 – Feb 2024

Bhopal, Madhya Pradesh | UI/UX Designer

- Designed intuitive interfaces for web and mobile applications.
- Conducted user research and synthesized insights to inform design decisions.
- Created wireframes, prototypes, and design systems.
- Collaborated with cross-functional teams to deliver quality products on time.

FEATURED PROJECTS

7Seers – AI-Powered Placement & Skilling Platform

Role: UX Designer

7Seers is a platform that bridges the gap between students and organizations by providing placement opportunities and preparing students to become job-ready.

- Conducted in-depth interviews with multiple students to understand what they lack, the challenges they face, and why they are not getting placed.
- Analyzed insights and identified key pain points in the current placement and skill development process.
- Collaborated with stakeholders to define goals, understand business needs, and map out the platform's vision.
- Worked closely with developers to understand technology constraints and feasibility.
- Designed end-to-end user experience including user flows, wireframes, and high-fidelity designs for students, mentors, and admin panels.
- Delivered an AI-powered platform that helps students build the right skills, improve employability, and get placed.

RideABit – Carpooling App (Live)

Role: UX Designer

RideABit is a carpooling application that connects people traveling on the same route so they can share rides and split travel expenses.

- Users who travel frequently on similar routes can host a ride, while others can join and split the cost, making travel affordable and convenient.
- Conduct regular feedback collection through in-app surveys, reviews, and conversations with users.
- Identify user pain points related to booking, communication, payments, safety, and overall experience.
- Translate feedback into actionable insights and prioritize feature improvements.
- Design and iterate app features and flows based on user needs and behavior.
- Collaborate with the product and development team to ship updates and continuously enhance the live product.
